# 2011 UAP SEED TREATMENT PRODUCTS

UAP Canada offers a range of seed treatment options to protect your crops. There are products available for several crops including wheat, barley, oats, peas, lentils, chickpeas, soybeans and dry beans.

- |                      |   |
|----------------------|---|
| <b>Rancona™ Apex</b> | Our newest and most exciting seed treatment available. Superior control of all major diseases on cereals with a special emphasis on fusarium, smuts and bunts. Extremely low dust off with a true liquid formulation. |
| <b>Vitaflo® 280</b>  | The standard in seed treatment, Vitaflo 280 has more diseases and crops than any other seed treatment. It provides the best value for the grower looking at keeping costs in line.                                    |
| <b>Crown®</b>        | A seed treatment containing carbathiin and thiabendazole for control of diseases in lentils and chickpeas. Superior activity on ascochyta lentis and ascochyta rabiei.  |
| <b>DB Red™ L</b>     | A contact seed treatment for controlling diseases on cereals. Very active on fusarium diseases including common bunt. This product makes an excellent resistance management product as it is a group M.               |

Rancona Apex, Vitaflo 280, and Crown are registered trademarks of Chemtura Canada Co./Cie. and distributed in Western Canada by UAP Canada. DB Red is a trademark of Loveland Products Inc. Member of CropLife Canada.
