

BROMOTRIL

MANA BROADLEAF WEED CONTROL

HERBICIDE

BROMOTRIL®

Bromoxynil

Howdy Pardner®. Bromotril delivers the same broadleaf weed control at a fair price.

Bromotril 240 EC provides excellent post-emergent broadleaf weed control in many crops with no concern for re-cropping or volatility to off-target crops.

Tough broadleaf weed control at a fair price: The active ingredient bromoxynil has long delivered broadleaf weed control at flexible crop and weed staging. Now, it's even better with Bromotril – the same, proven active ingredient as Pardner, but at a fair price.

Return on investment: Bromotril targets common yet difficult-to-control broadleaf weeds. With early weed control and tank-mix flexibility, Bromotril delivers one-shot weed control that provides high yields and returns. And Bromotril doesn't have any cropping restrictions, leaving your crop rotations open to take advantage of market conditions.

Group 6 mode of action: As a Group 6 herbicide, Bromotril is a key tool for managing herbicide resistance, especially for Group 2 kochia-resistant biotypes.

Wide window of application:

With early application flexibility, Bromotril puts more bushels in the bin by eliminating weeds early – but can still control some weeds up to the 8 leaf stage.

Tank-mixable for one-shot weed control:

As a dependable tank-mix partner, Bromotril can be tank-mixed with many grassy and broadleaf weed herbicides, saving even more time and money.

Tank-mixes:

- **Wheat:** MCPA, 2,4-D, Avenge®, Liquid Achieve® or Horizon®
- **Barley:** MCPA, 2,4-D, Avenge or Liquid Achieve
- **Oats:** MCPA
- **Corn:** Atrazine, Banvel®, Ultim® or Accent®
- **Fall rye:** MCPA
- **Flax:** MCPA or MCPA-K
- **Canaryseed:** MCPA
- **Zero-till chemfallow:** Roundup®
- **Seedling grasses:** MCPA

Key weeds:

- Cow cockle
- Kochia
- Pigweed
- Smartweeds
- Wild buckwheat

Application and Use Guidelines:

Crop staging: For best results, spray when weeds are in the seedling stage. Apply in good growing conditions before the crop shields the weeds. When Bromotril is used alone, most registered cereal crops can be treated from the 2 leaf to flag leaf stage. Follow labels on both tank-mix partners for optimum crop safety.

Easy to use: Bromotril is conveniently packaged in 2 x 9.7-litre jugs, and at typical application rates, one case treats 40 acres. Typical rates are from 485 to 570 mL/acre (1.2 to 1.4 L/ha).

Cover ground fast: Apply at a water volume that will provide good coverage, in the 5 to 10 gallons per acre range (22-45 L/acre) depending on the crop and weeds present.

Crop safe: Bromotril is easy on the crop.

Alfalfa	Grasses (seedling)
Barley	Millet (forage)
Canaryseed	Oats
Corn	Sorghum (forage)
Fall rye	Triticale
Garlic	Wheat (spring and winter)

Mixing instructions: Follow mixing instructions on the labels of both tank-mix partners.

Beat the weather: With Bromotril, you can get the job done fast. It is rainfast in 30 minutes.

Weeds controlled:

Seedling up to 4 leaf stage

American nightshade
Bluebur
Cocklebur
Common ragweed
Cow cockle*
Green smartweed
Kochia**
Lady's-thumb
Pale smartweed
Pigweed*
Russian thistle**
Stink weed*
Velvetleaf***
Wild mustard*

Seedling up to 8 leaf stage

Common buckwheat
Common groundsel
Lamb's-quarters
Tartary buckwheat
Wild buckwheat

* In normal conditions will be controlled up to 4 leaf stage. Plants beyond this stage are unlikely to be controlled; the higher rate generally gives better results.
** Spray before plants are 5 cm high.
*** Spray before plants are 8 cm high.

Quality Products. Competitive Prices.

MANA makes sense for growers, for channel partners, for agriculture. Headquartered in Winnipeg, Manitoba, MANA Canada currently offers nearly 20 branded insecticides, fungicides and herbicides from a portfolio of more than 18 strategic active ingredients – and our product portfolio continues to grow. As the North American arm of the world's largest off-patent manufacturer and the seventh largest agrochemical company, MANA provides best-in-class formulations, regulatory capabilities, and field research.

MANA is the right crop protection partner because we offer a consistent supply of superior formulations sold at fair prices. Our proven products are efficiently manufactured to the highest standards and value-priced to optimize the profitability potential of your business. Control, consistency and cost are the MANA advantages.

For more information contact your MANA representative to discuss your local crop protection needs.
