

### **Control a wide spectrum of grass and broadleaf weeds**

Eptam<sup>®</sup> 8-E delivers effective solutions in your weed control program. Eptam fits exceptionally well in rotations to crops that are sensitive to other herbicides as there are no rotational crop restrictions and the product dissipates before normal planting to other crops. Eptam 8-E is a selective herbicide that, for most uses, must be soil incorporated post plant pre-emerge, pre-plant, injected subsurface into the soil, or applied in the irrigation water for control of weeds. Active ingredient, EPTC, controls weeds by interfering with normal germination and seedling development. Eptam does not control established or germinated weeds present at the application.

#### **Benefits**

- No rotational crop restrictions
- Flexible incorporation methods
- Flexible application timings
- Flexible rates targeted to weed density
- Tank mix compatibility with other products

#### **Registered Crops**

- Alfalfa & Birdsfoot Trefoil
- Beans – green or dry
- Cicer milkvetch & Sweet Clover
- Flax (Western Canada Only)
- Potatoes
- Sugar beets
- Sunflowers
- Turnips & Rutabagas

#### **Broadleaf weeds controlled**

- Common Chickweed
- Corn Spurry
- Deadnettle (Henbit)
- Hairy Nightshade\*
- Common Lambsquarters\*
- Nettleleaf Goosefoot
- Common Purslane
- Prostrate Pigweed\*
- Redroot Pigweed\* (Common Pigweed)
- Tumble Pigweed\*

\*For heavy populations use high rates.

#### **Annual grasses controlled**

- Annual Bluegrass
- Annual Ryegrass (Italian ryegrass)
- Barnyardgrass (Watergrass)
- Crabgrass
- Green Foxtail
- Fall Panicum
- Field Sandbur
- Shattercane
- Volunteer grains (Barley, Oats, Wheat)
- Wild Oats\*
- Yellow Foxtail

#### **Perennial grasses controlled**

- Quackgrass (Couchgrass, Twitchgrass)
- Yellow Nutsedge

#### **Application: Preplant incorporated (PPI)**

- Eptam must be thoroughly incorporated into the top 2 to 3 inches of soil immediately after application for effective activity. See label for application and incorporation details.
- May be applied with liquid fertilizer or impregnated on dry fertilizer
