

FOLPAN

MANA CROP DISEASE CONTROL

FUNGICIDE

FOLPAN®

80WDG

A fool-proof plan for disease control in grapes – exclusively from MANA.

Folpan is a contact fungicide with protective activity against fungal diseases in grapes, as well as a number of other fruit, vegetable, and ornamental crops.

Return on investment: Folpan 80WDG is a water-dispersible granular fungicide, and delivers exceptional protection against the most common, economically damaging diseases in grapes.

Group M mode of action: Folpan contains the active ingredient folpet, and is classified as a Group M fungicide, with multi-site activity.

Resistance management: With multi-site activity, Folpan provides an excellent resistant management option. With the use of appropriate Integrated Pest Management practices, Folpan is a key fungicide for managing fungicide resistance.

Protect the fruits of your labour:

Mildews, fruit rots and spots can easily degrade or destroy marketable grapes and fruit crops. Used in a regularly scheduled maintenance program, Folpan controls these damaging diseases to help improve marketable yields.

Easy to use: Folpan makes crop protection easy. It can be used with most common insecticides, adjuvants and fungicides, cutting down on trips over the field and improving timeliness of fungicide application for even better disease control and yields.

Tank-mixes: Folpan can be combined with most commonly used insecticides, adjuvants and fungicides. Check compatibilities before making tank-mixes. Fungicidal activity is reduced if combined with strongly alkaline materials such as hydrated lime. Do not use in combination with or closely following an oil spray.

Key diseases:

- Downy mildew
- Powdery mildew
- Black rot
- Dead arm

Brand Results.**

Application and Use Guidelines:

Application rate is 500 ml to 2 litres per acre (1.25 to 5 kg per ha). Check label for complete recommendations.

Crop	Diseases	Timing
Apples, crabapples	Alternaria leaf spot, black rot, Brooks spot, fly-speck, scab, sooty blotch	Apply in a regular protective schedule from green tip up until harvest. Do not apply more than 6 applications per season. See label for additional precautions
Cranberries	Fruit rot	Apply when 5% of blossoms are open. Repeat 10 to 14 days later when 50% to 75% of blossoms are open.
Grapes	Dead arm	Apply when new shoots are 1 to 2 inches (2.5 to 5.0 cm) long and repeat when growth is 4 to 6 inches long.
Grapes	Black rot, downy mildew	Apply just before bloom, just after bloom, and in first cover spray. For downy mildew, an additional application 2 to 3 weeks later may be needed.
Grapes	Powdery mildew	Apply in a tank-mix with Kumulus DF at first sign of mildew and repeat after 10 days.
Field cucumbers, melons, pumpkins, squash	Anthrachnose, downy mildew	Apply when first true leaves appear. Repeat at 7-day intervals until crop is harvested.
Field tomatoes	Anthrachnose	Apply during first bloom and repeat at 7-day intervals until harvest.
Strawberries	Gray mold, fruit rot, leaf spot	Apply before first infection and repeat at 7-day intervals to protect crop until harvest.
Carnations, poinsettias, azaleas, marigolds, zinnias, chrysanthemums, irises, snapdragons	Blight, Phythium root rot, stem rot, Alternaria leaf spot, Septoria leaf spot, Didymellina leaf spot, Anthracnose (depending on ornamental)	Generally, apply when ornamental emerges and repeat at regular intervals. Consult label for timing on specific disease and ornamental.

Get complete coverage for best control: Apply Folpan in 90 to 270 gallons of water per acre (1000 to 3000 L per ha) depending on the crop, to achieve thorough coverage and the best protection against fungal diseases.

Ensure complete mixing: Fill spray tank nearly full and pour recommended amount of Folpan on surface of water. Fungicide can be premixed in a bucket half filled with water. Mix can be poured through screen into nearly filled spray tank. Finish filling tank. Keep agitator running during filling and spraying.

MANA makes sense for growers, for channel partners, for agriculture. Headquartered in Calgary, Alberta, MANA Canada currently offers nearly 20 branded insecticides, fungicides and herbicides from a portfolio of more than 16 strategic active ingredients – and our product portfolio continues to grow. As the North American arm of the world's largest off-patent manufacturer and seventh largest agrochemical company, MANA provides best-in-class formulations, regulatory capabilities and field research.

MANA is the right crop protection partner because we offer a consistent supply of superior formulations sold at fair prices. Our proven products are efficiently manufactured to the highest standards and value-priced to optimize your farm's profitability potential. Control, consistency and cost are the MANA advantages. For more information, contact your MANA representative to discuss your local crop protection needs.
