

# mizer®

LIQUID SOIL SURFACTANT  
SURFACTANT LIQUIDE POUR LE SOL

- Helps hold optimum levels of water in the root zone profile
- Non-glycol based - less burn potential on fairway turf
- Formulated for use through irrigation systems or through conventional application equipment
- Gets moisture to the root zone without holding water near the surface
- Flexible application program - managed application or intensive split dose application programs
- Penetrant allows better movement through the soils structure
- Increases resistance to drought conditions
- Improves the soil environment for healthy microbial activity

Always read and follow label directions
