

PYRATE 480 EC

- Controls turf pests in **golf courses, along highway medians, and on sod farms.**
- **For control of Ants, Chinch bugs, Cutworms** – 22.5 ml/100m² when pests first appear, repeat as needed with a maximum of 2 applications per season.
- **Crane Fly Larvae (leatherjackets)** – 20–25ml/100m² applied at drenching spray in water in late fall after flight of adult crane flies has ceased for the year.
- **Sod Webworms** – 22.5 ml/100m² delay watering or mowing for 12 to 24 hours after treatment.
- **Turfgrass (Hyperodea) Weevil (Annual and Bluegrass Weevil)** – 22.5 ml/100m² mid–April and again in mid–May or as recommended by local agricultural representatives.
- Compatible with insecticides, miticides, and fungicides commonly recommended except for alkaline materials such as Bordeaux mixture and lime.
- Pyrate 480 EC is also registered for control of pests in **ornamentals** (commercial production only) in **greenhouses, nurseries and industrial sites, native elm bark beetle, industrial indoor pests, and mosquito control** (restricted use only)

22.5 ml/100m² – 112 mL/500m² = 225 ml/100m² = 2.25 L/ha (10,000m²)
