

SERENADE[®] MAX

SERENADE[®] MAX— For Proven Control of Botrytis in Grapes

 **CANADA**

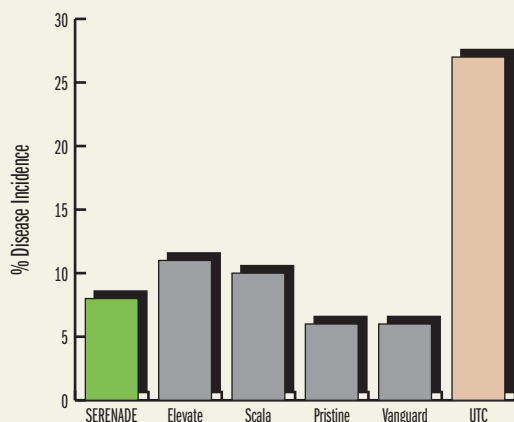

SERENADE[®] MAX is proven effective for battling fungal diseases of grapes, including Botrytis and powdery mildew. Derived from ***Bacillus subtilis*** and powered by biochemicals called lipopeptides,

SERENADE MAX has a complex, multi-site mode of action which effectively destroys disease pathogens while also managing resistance. Add SERENADE MAX to your disease program for broad spectrum disease control, superior food and worker safety, and improved overall performance. From bloom to harvest, SERENADE MAX protects your crop with the proven power of biochemistry.

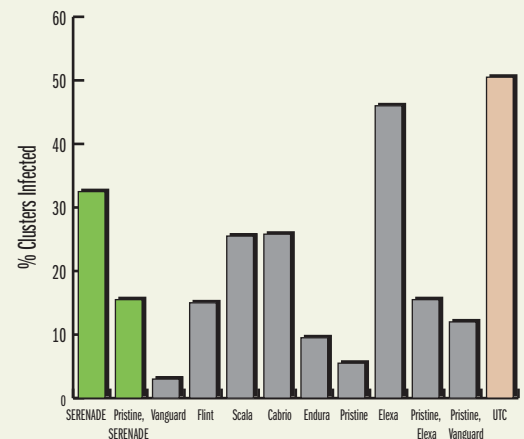

SERENADE MAX vs. Botrytis Bunch Rot of Grapes

L. Bettiga, UCCE, Monterey County, CA - 2004

SERENADE MAX vs. Botrytis of Grapes

WF Wilcox, Cornell University, Geneva, NY - 2005
