

## NUTRIENTS

**AWAKEN** - For turf managers looking to maximize early season plant performance and end of season returns. Awaken plant nutrient system provides improved early season stress resistance. Awaken strengthens roots and builds drought resistance for many crops in turf and horticultural crops.

**Green With Envy** - 16-8-3 with micros. Stress fighter and vegetative growth enhancer especially effective in cold wet soils and hot dry soils. May be used alone or tank mixed with herbicides. Promotes growth at 42 mL per 100m<sup>2</sup> in 1.5-2 L of water.

**K-Fight** 0-0-25 – Stress fighter enhances turf over-wintering ability. Used on greens in early to late fall to boost internal defense mechanisms. Use 85-150 mL per 100m<sup>2</sup> in 7.5 L of water.

**NORTRACE** 35-5-10 with Fe - Highly soluble fertilizer plus chelated micronutrients.

**Plantacote<sup>®</sup> pluss** - 100% coated controlled release fertilizer with a release time of 4, 6, 8, 12 or 16 months. Also contains micronutrients. A unique and very resilient coating that releases its homogeneous contents based on soil temperature.

## RODENTICIDES

**Ramik Green** - Fish flavoured, 0.005% Diphacinone weatherproof pellets used in outdoor bait stations around buildings, and tree nurseries.

**Ramik Brown** - Apple flavored for use in bait stations around building and tree nurseries, weatherproof, with mold inhibitors.

**Rodent Pellets** - 2% Zinc phosphide with gelatinized (weatherproof) oat base.

## HERBICIDES

**Casoron G4** - For complete weed control around trees **Casoron G4** delivers high value weed control in a convenient granular application. The unique granular herbicide forms a vapour barrier in the soil, preventing weed seed germination. Safe on many trees and shrubs. Use around trees and landscaped areas of the golf course.

**Mecoprop P** - Liquid herbicide for use on grasses including turf, golf greens and fairways. It controls tough to control annual and perennial weeds. May be tank mixed for chickweed in turf.

**PAR III** - Canada's leading turf weed management product. The most trusted name in golf course and turf management systems. **PAR III** provides safe proven broad-spectrum control of broadleaf weeds in lawns, golf courses and sports fields. Keeps turf free of tough weeds such as dandelion, poison ivy, clovers and ground ivy.

## FUNGICIDES

**QUINTOZENE 75** - Preventative protection from gray and pink snow mold in ryegrass, fescue bluegrass, bent grass and similar species of turf grass. Economical, consistently proven performance.

0-0-6 with 15% **QUINTOZENE** -

Provides the added benefit of a 6% soluble potash granular carrier. Proven preventative snow mold control in bluegrass blends with fine fescue and perennial ryegrass, bent grass or bent grass mixtures.

- A broad-spectrum, non-systemic contact fungicide ideal for disease resistance management program as there has never been an instance of resistance in any disease on the label. Used in golf courses and sod farms for the control of brown patch, leaf spot, damping off and root rot.

## INSECTICIDES

**Pyrate** - Chlorpyrifos active for use on turf on golf courses, road medians and industrial sites. For control of ants, chinch bugs, cutworms, crane fly larvae (yellowjackets), sod webworm and turfgrass weevils.

## SPECIALTY PRODUCTS

**ALL CLEAR**

- 3-way mode of action - surfactant, sequestrant and degradant. Particularly good in the tank to remove in-tank and in-line residues.

**CHOICE**

- Water conditioning agent. Lowers pH and softens water with high mineral content.

**Dye Lake Colorant** - Blue dye in soluble pouch for colouring ponds and lakes. May reduce algae growth.

**FIGHTER-F**

- Silicone product that lowers surface tension in bubbles and foam, causing them to collapse. Available in liquid or dry flowable formulations.

**LI 700**

- A premium non-ionic, penetrating surfactant that lowers water pH to avoid accelerated pesticide breakdown. Droplet size management tool.

**RESPOND3**

- A technologically advanced water management tool with improved re-wetting agents, superior penetrant and concentrated spreader. Water reaches the root zone where turf quality is most affected.

**RESPOND3C**

- A technologically advanced water management tool with Biodac carrier. With improved re-wetting agents, superior penetrant and concentrated spreader. Water reaches the root zone where turf quality is most affected. Suited for spot treatments and difficult areas such as bunker surrounds.

**Turf Trax Blue** - The proven and professional way to apply liquid pesticides and fertilizers. **Turf Trax Blue** dissipates quickly in either wet or dry weather, making it the ideal temporary spray colorant. The distinctive color shows exactly where product has been sprayed, preventing skips and overlaps and helping to pinpoint drift.

**Scent Winter Green** - Masks pesticide odours with a winter green fragrance.
