## **DIRECTIONS FOR USE:**

### **1. TANK MIX WITH AATREX 480 LIQUID HERBICIDE:**

XA OIL CONCENTRATE is a blend of light agricultural spray oil and a surfactant that is especially suited for use with AATREX 480 LIQUID HERBICIDE. When XA OIL CONCENTRATE is added to the spray mixture, the post emergence activity of AATREX 480 LIQUID HERBICIDE may be improved, particularly on quackgrass, nutgrass and annual grasses such as green and yellow foxtail and barnyard grass. The period of application may also be extended for broadleaf control.

XA OIL CONCENTRATE plus AATREX 480 LIQUID HERBICIDE has given satisfactory control of broadleaf weeds up to 10 cm high. Annual grasses should be treated when in the 1 - 2 leaf stage (not over 3 cm high). Apply before 21 days after planting date or before corn is 15 cm high.

**MIXING:** Fill sprayer tank at least half full with water and engage agitation system. Add the desired amount of AATREX 480 LIQUID HERBICIDE. Continue to fill spray tank leaving enough room to add the XA OIL CONCENTRATE. Add the desired amount of XA OIL CONCENTRATE last and continue to agitate. After any break in the spraying operation, agitate thoroughly. Before refilling, empty spray tank to prevent a buildup of oil in the tank. If any spray mixture remains in the tank, continue to agitate to avoid a separation of the oil from the water. If any oil film starts to build up in the tank, drain and clean tank with a strong detergent solution.

**RATES:** Use 2.75 - 5.50 L/ha of XA OIL CONCENTRATE plus the recommended amount of AATREX 480 LIQUID HERBICIDE in 200 - 300 L of water/ha. This is at the rate of 1.25 L XA OIL CONCENTRATE per 100 L of water.

### **CAUTION**

Care should be taken when applying XA OIL CONCENTRATE on new corn varieties especially those not treated previously with concentrated oils. Oil concentrates may cause crop injury when applied to a crop which is in a stress condition from extreme weather conditions such as cold, backward weather or hot dry weather and drought. The risk of damage to other vegetation from spray drift is increased with the use of AATREX 480 LIQUID HERBICIDE in oil-water emulsion.

Do not add 2,4-D, MCPA, 2,4-DB, Cyanazine, MCPB or dicamba or any other herbicide to a mixture of XA OIL CONCENTRATE and AATREX 480 LIQUID HERBICIDE. Do not reduce the rates recommended on the AATREX 480 LIQUID HERBICIDE label.

**2. TANK MIX WITH ASSURE II HERBICIDE:**

Use 5 - 10 L of XA OIL CONCENTRATE /1000 L of spray solution.

**3. TANK MIX WITH BASAGRAN LIQUID HERBICIDE AND BASAGRAN FORTE HERBICIDE:**

Ground Application: 100 - 400 L/ha

Use 1 L of XA OIL CONCENTRATE /100 L of spray volume to a maximum rate of 2 L/ha. Restrict application rate to 1 L/ha under hot, humid conditions.

Aerial Application: 50 - 100 L/ha.

Use 0.125 - 0.25 L of XA OIL CONCENTRATE /ha. Do not use XA OIL CONCENTRATE in excess of 0.25 L/ha as substantial crop injury could occur.

**4. TANK MIX WITH LADDOK HERBICIDE:**

Use 10 L of XA OIL CONCENTRATE /1000 L of spray solution.

**PRECAUTIONS**

KEEP OUT OF REACH OF CHILDREN. Read and follow label directions and apply only as recommended and at recommended rates. Avoid drifting of herbicide into areas other than those to be sprayed. Avoid excessive or violent agitation of materials in spray tank. Excessive agitation may result in an invert emulsion (sludging or buttering out) causing coagulation and setting of suspended materials. Follow mixing instructions carefully. Immediately after use, thoroughly clean the sprayer by flushing the system with water containing detergent. Keep container tightly sealed and do not allow water to be added to the contents of this container during storage.

**FIRST AID**

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control centre or doctor for treatment advice. IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice. IF SWALLOWED: Call a poison control centre or doctor immediately for treatment advice. Do not induce vomiting unless told to do so by poison control centre or doctor. Do not give **any** liquid to the person. Do not give anything by mouth to an unconscious person. IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferable by mouth-to-mouth, if possible. Call a poison control centre or doctor for treatment advice. Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

**TOXICOLOGICAL INFORMATION:** This product contains petroleum distillates. Vomiting may cause aspiration pneumonia. Treat symptomatically.

**DISPOSAL**

1. Triple- or pressure-rinse the empty container. Add the rinsings to the spray mixture in the tank.
2. Follow provincial instructions for any required additional cleaning of the container prior to its disposal.
3. Make the empty container unsuitable for further use.
4. Dispose of the container in accordance with provincial requirements.
5. For information on the disposal of unused, unwanted product, contact the manufacturer or the provincial regulatory agency. Contact the manufacturer and the provincial regulatory agency in case of a spill, and for clean-up of spills.

**NOTICE TO USER:** This pest control product is to be used only in accordance with the directions on this label. It is an offence under the *PEST CONTROL PRODUCTS ACT* to use this product in a way that is inconsistent with the directions on the label. The user assumes the risk to persons or property that arises from any such use of this product.
